Pier on Bevan & Reef Ball Project

"Sidney by the Sea" is the gateway to premier BC diving. Numerous, healthy, and divers within 20 minutes travel, await the adventurous explorer.

At our storefront, the [award winning](#) Reef Ball Project is one such site. It surrounds the Pier, is a shore entry dive, and excellent training site.

What is A Reef Ball?

"A reef ball is a special type of artificial reef that is utilized for the Pier on Bevan Pro. moulds were made and donated by Reef Ball Development Ltd, Georgia, USA. The reef balls, by Artificial Reef Structures, are made of an environmentally friendly concrete formula that creates a healthy environment for fish, shellfish, and many other marine animals and plants.
